Notes (02/26/2024)

Tips for Preventing Cybercrimes:

1. Phishing:
   - Verify email sender addresses before clicking on any links.
   - Avoid providing sensitive information via email; use secure channels.
2. Malware:
   - Install reputable antivirus software and keep it up to date.
   - Be cautious when downloading files or clicking on pop-ups.
3. Identity Theft:
   - Use strong, unique passwords for each online account.
   - Enable two-factor authentication whenever possible.
4. Social Engineering:
   - Be skeptical of unsolicited requests for personal information.
   - Verify the identity of individuals before sharing sensitive data.
5. Online Scams:
   - Research and validate offers or requests for money.
   - Trust your instincts; if it seems too good to be true, it probably is.
6. Data Breaches:
   - Regularly monitor your financial and online accounts.
   - Change passwords immediately if you suspect a data breach.
